

I have been working with Work Opportunities in their placements with my participants and I have had very good results in job placements. They are very professional, courteous, and knowledgeable of job in the area. Franklin County is a tough county to help with obtaining employment but they go above and beyond in helping find jobs that my participants may not have otherwise been able to obtain on their own. They also follow thru after the placement and I find that shows that they are very caring and do a thorough job. It is a pleasure working with them.
